Officer of the Department of Technical Information Protection at the Main Department of the Ministry of Internal Affairs of Ukraine of Ukraine in the Vinnytsia Region.

Education

IT Academy Vinnitsa, Ukraine 2014 – 2015	**Studied programming**
Kharkov National University of Internal Affairs 2004 – 2008	**Bachelor of informational security**

Functional Skill Set

§ Time management
§ Ability for efficient problem solving
§ Goals orientated
§ Ability to handle stress and work in multi-tasking situations
§ Teamwork
§ Ability to multi-task, react quickly to shifting priorities
§ Continuously monitoring industry trends, technologies and standards

§ Able to clearly communicate technical data to non-technical colleagues and clients
§ Possessing all-round analysis and programming skills

Technical Skill Set		
	Languages	[Ruby, PHP, JavaScript, XML, HTML/HAML, CSS/SASS, C++, C#, QML]
	Libraries/kits	[JQuery, D3.js, Chart JS, Leaflet, Momemt.Js, Xeditable, Summernote/ckeditor, MDB, Bootstrap, Font Awesome, Imagemagick, QT SDK, Android SDK]
	Technologies	[AJAX, RESTful]
	Databases	[MySQL, MongoDB, PostgreSQL]
	Frameworks	[Rails, Laravel]
	CMS implementation	[WordPress, OpenCart, Joomla, Drupal]
	Graphics software	[Photoshop, Illustrator, CorelDraw]
	OS	[Windows, Ubuntu, Fedora, CentOS]
	Development tools	[Putty, Git, Redmine, Jira, Trello]
	IDE's	[NetBeans, Qt Creator, Visual Studio, Android Studio, WEB/PhpStorm, RubyMine]
	Methodologies	[OOP, MVC]
	SCM's	[GitHub, Bitbucket, GitLab]
	Other knowledge's	[Network technology's, Deploy, Agile, Heroku, AWS]

Experience in development for Windows/Linux/MacOS platforms

Experience the collective teamwork software development (design, build release, make installation packages, deploy app, testing)

Doroga2017	GitLink: https://gitlab.com/softgen.vn/doroga2017.git (private) WebLink: http://doroga2017.info/ Process time: 06.03.2017 – till day Project's language – Ruby, framework - Rails The "*Doroga2017*" is designed to collect and display real information about the real state of roads Ukraine *Role and Contribution :* § Developing and maintaining the backend functionality of website; § Deploying project to VPS;
Medreforma	GitLink: https://gitlab.com/softgen.vn/community_map.git (private) WebLink: http://medreforma.info/ Process time: 17.01.2017 – till day Project's language – Ruby, framework - Rails The " *Medreforma* "is designed to review the results of health reform in Ukraine *Role and Contribution :* § Developing and maintaining the front/back -end functionality of website; § Creating new application "from scratch"; § Deploying project to VPS;
Donors Map	GitLink: https://gitlab.com/enemy/donorsMap.git (private) WebLink: http://donors.decentralization.gov.ua/, http://u-lead.decentralization.gov.ua/(http://u-lead.decentralisation.gov.ua/), etc. Process time: 26.10.2016 – till day Project's language – Ruby, framework - Rails The "Donors map" designed to display donor's projects/programs that operate on the territory of Ukraine. The main goal is to show where there are projects, their sum, and other details of the program/ project *Role and Contribution :* § Developing and maintaining the front/back -end functionality of websites; § Creating new application "from scratch"; § Managing team of project;

§ Deploying project to VPS;
§ Managing task in Trello

Projects	*OpenBudget*	GitLink: https://github.com/kavaleriy/budget (public)

WebLink: https://openbudget.in.ua/

Process time: 07.2016 – till day

Project's language – Ruby, framework - Rails

The "Open Budget" is intended to create tools to increase transparency and accountability of local authorities.

Role and Contribution :
§ Developing and maintaining the front/back -end functionality of websites;
§ Creating new and correcting existing web application modules;
§ Managing team of project;
§ Deploying project to VPS;
§ Redesign app interface;
§ Refactoring old code |

Budget2017

GitLink: https://gitlab.com/enemy/budget2017 (private)

WebLink: http://budget2017.info/

Process time: 28.09.2016 – 27.12.2016

Project's language – Ruby, framework - Rails

The "Budget2017" is designed to display infographics country budgets.

The goal of the project is that with the help of graphs and other visualizations show a difference in the country's budget over the years.

Role and Contribution :
- § Developing and maintaining the front/back -end functionality of websites;
- § Creating new web application modules;
- § Creating visualization (chart's);
- § Deploying project to VPS;
- § Redesign app interface;

Bldng.info

GitLink: https://gitlab.com/softgen.vn/CnC (private)

WebLink: http://bldng.info/

Process time: 15.07.2016 – till day

Project's language – Ruby, framework - Rails

The aim of our project - to provide local and associations of citizens online tool to control spending on utility bills and reduce consumption of gas, electricity and other resources.

The authorities will be able to analyze the consumption of gas, water, electricity and heat in homes - and introduce energy efficient changes. Servicing companies and businesses - to offer their services to the insulation of buildings, installation of energy-saving or of other changes based on public data. And the people - to save on costs and keep pace with innovations by neighbors.

Role and Contribution :
- § Deploying project to VPS;
- § Managing team of project.

OpenData	GitLink: https://gitlab.com/begemot.lery/opendata-dkan (private) WebLink: http://opendata.rada.gov.ua/ Process time: 26.03.2016 – 21.07.2016 Project's language – PHP, CMS - Drupal The portal is designed to provide access to public information Verkhovna Rada of Ukraine in the form of open data and provides access to information on the possibility of its use next. *Role and Contribution :* § Developing and maintaining the front-end functionality of websites; § Parse datasets from existing local source; § Install project to VMWare; § Redesign app interface; § Managing modules.
Germes	GitLink: https://bitbucket.org/enemy_vin/germes.git (private) WebLink: http://germesonline.com/ Process time: 25.11.2015 – 27.12.2015 Project's language – Ruby, framework - Rails Private personal static page app. *Role and Contribution :* § Developing and maintaining the front/back -end functionality of websites; § Creating static pages; § Deploying project to VPS

Student's project's. 01.2015 – 07.2015

ITAInformator	GitLink: https://github.com/ITAAcademy/ITAInformator IDE: Qt Creator OS: Windows/Linux Project's language – C++ Role and Contribution: § Involved in developing settings (save settings in *.ini file, parse settings file) and translation modules (on the fly); § Involved in developing currency functionality; § Fix bugs: conversion, about modules, etc.; § Redesign UI, build releases, made installation packages.

OpenBoard	GitLink: https://github.com/ITAAcademy/OpenBoad/ IDE: Qt Creator OS: Windows Project's language – C++ Role and Contribution : Involved in developing settings module (save settings in *.ini file, parse settings file); Involved in developing menu (animated buttons with functionality) and toolbar (with color piker) components; Involved in developing parser functionality (parse input keys and display it's with OpenGL helps); Involved in developing programs dialogs (font, color, open, save).
IntITA	GitLink: https://github.com/ITAAcademy/IntITA/ IDE: PhpStorm OS: Windows/Linux Project's language – PHP, use framework Yii. Role and Contribution: Involved in developing WYSIWYG-redactor (use Imperavi redactor); Create 2 plugins ("Save", "Close"); Create functionality "Load redactor" (load on click);
SEM	GitLink: https://github.com/enemy-vin/SEM/ IDE: WebStorm OS: Windows/Linux Project's language – HTML, JavaScript, CSS, Bootstrap Role and contribution: Involved in developing one-page site to solve math tasks; Create 2 scripts to solve equations (quadratic, cubic);

Personal Details		
	Date of birth	December 06, 1986
